

DVT SERIES

Pick-up Vertical Lathes with transfer technique

BENEFITS

- ▶ Automatic loading and unloading of the machine
- ▶ Workpiece transfer with maximum positioning accuracy
- ▶ No concatenations or turning stations between first and second clamping
- ▶ Optimal process design including the specific advantages of a hanging and a stationary spindle regarding gravity and chip fall
- ▶ The DVT is particularly space-saving compared to two individual machines with linking and turning station
- ▶ Control Siemens / Fanuc on request

Workpiece Transfer

The workpiece is transferred to the second chuck in clamped state without losing its position

DVT Series	Maximum turning diameter (mm)	Max. swing diameter (mm)	Workpiece height (clamp+workpiece) (mm)
200	220	260	315
300	300	320	300
400	450	510	470
500	500	510	470
630	570	630	450
750	630	750	500
