

H SERIES

Gear Cutting Machines

BENEFITS

- ▶ Flexible automation concepts
- ▶ Individually configurable from single part to series production
- ▶ Optional tool-free set-up
- ▶ Extreme rigidity guarantees high precision with high performance
- ▶ Different chamfering technologies optional
- ▶ All media units integrated into the machine
- ▶ ‚E-Mobility‘ equipment package optional

H250C with integrated chamfering
Perfect solution for hobbing and cutting,
defined chamfering with a flexible tool concept

H200 – the compact solution for wheels and shafts
Optimal combination of price and performance in
combination with optimal manufacturing solutions

Working Range	Max. workpiece diameter (mm)	Max. nominal modulus (mm)
80-200 S Series	220	350
250-400 M Series	300	350
600-800 L Series	450	470
900-2300 XL Series	500	470
